<b>Source Code System</b>	2.16.840.1.113883.4.642.1.454 - <i>AuditEventEntityRole</i>		

Level/ Type	Code	Display Name	Code System	Designations	Description
0-L	1	Patient	AuditEventEntityRole		This object is the patient that is the subject of care related to this event. It is identifiable by patient ID or equivalent. The patient may be either human or animal.
0-L	2	Location	AuditEventEntityRole		This is a location identified as related to the event. This is usually the location where the event took place. Note that for shipping, the usual events are arrival at a location or departure from a location.
0-L	3	Report	AuditEventEntityRole		This object is any kind of persistent document created as a result of the event. This could be a paper report, film, electronic report, DICOM Study, etc. Issues related to medical records life cycle management are conveyed elsewhere.
0-L	4	Domain Resource	AuditEventEntityRole		A logical object related to a health record event. This is any healthcare specific resource (object) not restricted to FHIR defined Resources.
0-L	5	Master file	AuditEventEntityRole		This is any configurable file used to control creation of documents. Examples include the objects maintained by the HL7 Master File transactions, Value Sets, etc.
0-L	6	User	AuditEventEntityRole		A human participant not otherwise identified by some other category.
0-L	7	List	AuditEventEntityRole		
0-L	8	Doctor	AuditEventEntityRole		Typically a licensed person who is providing or performing care related to the event, generally a physician. The key distinction between doctor and practitioner

				is with regards to their role, not the licensing. The doctor is the human who actually performed the work. The practitioner is the human or organization that is responsible for the work.
0-L	9	Subscriber	AuditEventEntityRole	A person or system that is being notified as part of the event. This is relevant in situations where automated systems provide notifications to other parties when an event took place.
0-L	10	Guarantor	AuditEventEntityRole	Insurance company, or any other organization who accepts responsibility for paying for the healthcare event.
0-L	11	Security User Entity	AuditEventEntityRole	A person or active system object involved in the event with a security role.
0-L	12	Security User Group	AuditEventEntityRole	A person or system object involved in the event with the authority to modify security roles of other objects.
0-L	13	Security Resource	AuditEventEntityRole	A passive object, such as a role table, that is relevant to the event.
0-L	14	Security Granularity Definition	AuditEventEntityRole	Relevant to certain RBAC security methodologies.
0-L	15	Provider	AuditEventEntityRole	Any person or organization responsible for providing care. This encompasses all forms of care, licensed or otherwise, and all sorts of teams and care groups. Note the distinction between practitioner and the doctor that actually provided the care to the patient.
0-L	16	Report Destination	AuditEventEntityRole	The source or destination for data transfer, when it does not match some other role.
0-L	17	Report Library	AuditEventEntityRole	A source or destination for data transfer that acts as an archive, database, or similar role.
0-L	18	Schedule	AuditEventEntityRole	An object that holds schedule information. This could be an appointment book, availability information, etc.
0-L	19	Customer	AuditEventEntityRole	An organization or person that is the recipient of services. This could be an organization that is buying services for a patient, or a person that is buying services for an animal.
0-L	20	Job	AuditEventEntityRole	An order, task, work item, procedure step, or other description of work to be performed; e.g. a particular instance of an MPPS.

0-L	21	Job Stream	AuditEventEntityRole	A list of jobs or a system that provides lists of jobs; e.g. an MWL SCP.
0-L	22	Table (Deprecated)	AuditEventEntityRole	
0-L	23	Routing Criteria	AuditEventEntityRole	An object that specifies or controls the routing or delivery of items. For example, a distribution list is the routing criteria for mail. The items delivered may be documents, jobs, or other objects.
0-L	24	Query	AuditEventEntityRole	The contents of a query. This is used to capture the contents of any kind of query. For security surveillance purposes knowing the queries being made is very important.
